

## **VET NO SHOWS ARE THE WORST INSULT TO AN ABUSIVE VET AFFAIRS SYSTEM FOR LOUSY MIS-TREATMENT AND ABUSES TO US!!**

As passive aggressive protests against the lousy treatment we receive from VA institution, VA has a very large problem with Vet appointment **no shows**. On the surface, it appears Vets are at fault for this behavior; however, no one asks what VA staff is doing to cause and encourage our 'misconduct.' I asked a nurse why so many no shows and she said, 'they [vets] get meds refilled then do not show up [wasting their time] for follow up appointments' then left it at that. Now I recognize why after undergoing the passive to outright direct hostile intolerance by some clinic staff employees and providers, doctors, and nurses like her. VA, same as all HMO systems, receives 'Capitation payments' from GAO for each active Vet on their rolls. More numbers means more money. Money for nothing when we are not in the clinic; losses when we are, with exception is for those paying with private insurance; those patients are lured in only for 3<sup>rd</sup> party pvt payer billing purposes adding more profit to GAO capitation payment. Another point is to drive away high liability, hard to treat or 'IP,' 'identified problem,' patients. In other words, institution staff 'cherry picks and lemon drops' or 'patient dumps' high responsibility or troublesome Vets to escape liability and onus same as private sector does. Especially high-risk and/or suicidal mental health cases.

Pushing the 'Suicide helpless line' is one of them; when something goes wrong the vendor is blamed for onus; same for offloaded patients to civilian free clinics via Mission Act, Vet Choice and the free clinic system. They get all responsibility while VA keeps budget to misappropriate elsewhere in its system. On my first visit, that was the first thing the VA MHC Dr. did. She prescribed meds, that only made me sicker, and brochures to civilian 'free' MHC clinics saying 'go there,' before sending me home. In other words 'PATIENT DUMPING' liability while keeping MHC budget in house that remained unspent and was misappropriated to other non-Veteran expenses feeding agency bureaucracy – VA bonuses, raises, perks and other employee benefits. See GAO, OIG and media scandals about those issues. However, being a taxpayer-supported institution, culling patients does not yet carry fiscal and legal consequences that private sector medicine faces when judiciously employing 'cherry picking, lemon dropping' patient dumping practices. I have undergone this experience at VA three times, so far. A medical staffer, usually a nurse but providers, doctors do it too, in private office setting provokes, needles and acts hostile toward a patient trying to force a knee-jerk reaction out of him or her. When a Vet protests, s/he then calls for backup security to remove the person, blames and flags the victim veteran as a 'problem patient.' In many cases, it angers, traumatizes a patient into not returning to the clinic and passively protesting by not showing up for appointments. Keeping vets out is profitable until capitation renewal arrives; then VA forces appointments on vet who never knows about it; until getting a no-show card from VA. A no show is the worst disrespect to VA's shenanigans! ***In the worst cases of VA provider abuses of vets is when, a Veteran kills self in clinic waiting room or parking lot or somewhere immediately off reservation when mental injury and VA's abusive prescriptions of deadly mental drugs finally overwhelms the person, and VA laments plausible denial that it cannot understand why....civilian authorities hide vet suicide as something other to cover up America's shame as crony to VA, soiling its integrity in partnership with VA.*** When recognizing this **hostile projective identification/projection** ploy by a staff member, consciously I control me from reacting in kind to an attack, disarming the situation. Then report s/he to executive offices and clinic director. Patient Advocate sweeps these matters under the carpet and those at the top remain forever isolated never knowing about real problems at the lower levels hiding behind plausible deniability until tragedy & scandal erupts.

In one case, an inexperienced NP still hit the eject button without probable cause, dumping me elsewhere, to hide her incompetence and neglect after I confronted her about it. Escaping liability for a high-risk patient – she sought to do that from the very first visit. Ms. NP was leaving the clinic anyway so did not face consequences for her actions right away. Someone from behind the scenes was coaching her same as Ms. Token PhD psychologist that did me in. I have seen this done to other Vet patients before understanding some of the agencies methods behind its madness; bureaucracy is paid sucking taxpayer sugar-tit; vets get abused. On the surface it appears the Veteran's are at fault for why VA is losing patient numbers; not what VA employees are doing causing those losses!

Same for Vet suicides on and off VA campuses! No one is asking or even looking at what that institution's staff is doing, behind closed doors, causing and exacerbating those deaths! That was my reason for walking away over 40 years ago after discharge and swearing I would die before ever setting foot in that shit hole again after my tolerance for mistreatment and racial bias by those bureaucrats reached maximum limits. I was dead when carried

into the regional hospital, which demanded me after the local private hospital ICU stabilized my condition. Not much about VA has changed in 40 years, just different facilities, faces, and politicians: SOS in a different paper cup. **Appointment no shows and suicides are Veteran protests against the lousy mistreatment we are receiving from the whole multi-billion-dollar annual US govt cabinet agency!**

*VA 'chicken little's' against all privatization derailing VA's gravy train all claim that the plan will never work citing end of the earth dire consequences at mere mention of such blasphemy. How can they know that? It has never been globally attempted. However, privatization is very successful according to each Veteran that never sets foot in a VA facility and per all of us who self-privatize each day either partly or in toto out of that hell care and benefit system. Every Veteran I personally know, only goes to VA clinics only for service connected circumstances maintaining his or her disability status from another 'blackmail,' extortion re-denial for a bullied no show appointment! The rest of their medical care, including medicines, come from private sector healthcare, oft times including service connected conditions because they mistrust VA incompetence to not cripple them more!! Those vets who qualify for Medicaid get better care and free meds than what VA offers! So she uses that!*

*The most damning fact that privatized Veteran healthcare works is over 98% of all US Veterans do not use VA at all, per a Rand Report. VA 'cooked' numbers are that over 70% do not use VA at all. Independent polls, unskewed by VA bias, from a cross section of all US Veterans who responded conclusively returned that over 88% of them want private healthcare and true choice for care outside of VA. In other words, a majority of military veterans want private care, do not use VA at all; and those who do only use a small part of it notwithstanding the captive 'prison inmates' who cannot get healthcare anywhere else. 100 of these captives commit suicide every day ending their pain protesting against injustice of a national shame. Only the deaf, dumb, blind, and stupid American's refuse to see this at least vaguely.*

*No one, except the profiteers, cares that over 100 Vets and active duty personnel self-destruct each day from not getting needed care from this country? In my opinion, this wholesale suffering and death is exactly the intent in toto because these circumstances repetitively, continue to occur now as they have for nearly a century! VA seeks to profiteer from the tragedy screaming for more money to hire mental health providers who already fail beyond belief. Topically it makes no sense until applying the following precept: if you cannot understand why something is happening especially in politics, look at the consequences and infer a motivation. VA profiteering! That incentive is to be rid of 'useless eater' US Veterans, as unfunded war costs well after a war ends, before entering into another one as one would dispose of surplus Government Issue and obsolete, unfunded government liabilities in the most efficient manner possible for maximum return of investment or ROI. While hiding those motives – the ongoing Vet suicide problem is extremely profitable. In other words, examine the product. Is it lousy but profitable then what is the motive behind the whole? \$\$\$! Killing Vets, using them as human lab monkeys and suicide for profit, perhaps? The VA as the worst healthcare system in the US, produces a lousy product yet is rewarded hundreds of billions annually and with bonuses in the hundreds of billions of dollars spread liberally among many hogs at the pork trough excepting Veterans on par. This has been the situation since VA inception a century ago. History proves that repeatedly. Is that our true patriotic sacrifice contrasting Neo-fashion to dark ages of burning heretics, cutting out men's hearts and more on sacred altars to appease the WAR 'gods' in the tribes favor? Finally, VA figured out how to profit from the current Vet suicide epidemic – isn't that soooo American?*

On 'OBIDEN'S PACT ACT' opening day, a veteran heads to a local socialist US government Veterans Administration, VA clinic to register for earned benefits promised by US leftists; not realizing earned benefits or broken-govt-promises are worthless at US govt Veterans Affairs. Big discrepancy in promising and actually paying them. Suddenly a very large 'wild and woolly' VA PACT ACT provider trolling for some ass, surprises him, snatches away his club, abuses the surprised veteran, and then goes away to do whatever bureaucrats do all day robbing taxpayers and vets at VA. Ever wonder what? Troll for ass playing hide the wienie! The angry veteran buys a gun and returns to the clinic 'loaded for bear' as it were. Surprise! A trolling for ass VA provider catches him off guard, steals his gun and again dreadfully abuses the man bent over a chair to stomp break his improper attitude about vet entitlement. What does he think is this? Welfare? Wrong line veteran. Welfare and unemployment offices down the street if you can find them! VA welfare is only for bureaucracy! Limping out of the clinic with a butt-load of pain the veteran buys a machine gun and returns; ditto, our sneaky trolling-for-ass bureaucrat strikes again, purloins the weapon and unabashedly abuses the veteran before wandering off with a big smile on their faces... Rumor has it the VA sells weapons at a local leftist black market gun show on first Monday of each month and Stalin's birthday. 'Okay, VA, you are dead meat,' says our veteran and he comes back with a bazooka. After blowing away half of the clinic, no lives lost, all the staff dope pushers were out back taking bribes, filling their soft money Swiss bank accounts, for VA provided opiate prescriptions. Satisfied that he got those perverted bastards, our pissed veteran turns to go and surprise! The very horny trolling for ass, sneaky VA bureaucracy, which has been standing behind him all along, takes the bazooka, and shamelessly has a gang-banger-party with the veteran bent over a desk held down by a paper weight delivering multiple butt-loads of pain without anal-lube. **When finished, the VA bureaucrats laughed to say, ' you know what long-suffering masochistic-veteran? I don't think the reason you keep returning here to 'our lady-of-SUFFERING! S&M-BUTTLOAD-OF-PAIN-VA-CLINIC,' is to register for O'BIDEN'S, PACT-ACT benefits... '**

**Next VET appointment at VA clinic was a NO SHOW!**
